## **Dewey Decimal Classification Chart**

The Dewey Decimal Classification system, sometimes abbreviated *DDC*, is a method of categorizing books in a library by subject matter. It is a numerical system using groupings of ten — i.e. there are ten major classes, each of which has ten divisions, each of which has ten sections — and books are placed on the shelf in numerical order. In most libraries the Dewey number and the first three letters of the author's last name become the book's call number. The Dewey Decimal system was created by Melvil Dewey in 1876.
